

JOHN IKPEME

DATA SCIENTIST & MACHINE LEARNING ENGINEER

Portfolio | johnprecious88@gmail.com | (234)90671-671-82 | [LinkedIn](#)

PROFESSIONAL SUMMARY

I thrive on turning raw data into actionable insights, building intelligent systems, and crafting seamless user experiences. Whether it's developing machine learning models, automating workflows, creating real-time monitoring tools, or designing interactive web applications, I bring a hands-on approach to problem-solving with data and technology. With over six years of experience, I bridge the gap between data science, automation, and front-end development to build scalable and impactful solutions.

EDUCATION & CERTIFICATIONS

BACHELOR'S DEGREE Petroleum Engineering Covenant University, 4.3 CGPA	2013 – 2018
CERTIFICATION Google Data Analytics	2023
CERTIFICATION SQL for Data Analysis Udacity	2023

WORK EXPERIENCE

Business Intelligence Analyst Hugo Inc. Remote	Feb 2026 – Present
- Built Hugo's Intelligence Hub, the platform used to run CX, finance, and operations across every client. It replaced a tangle of spreadsheets, BI tools, and email reports with one place where leadership, ops, and SLA teams pull their numbers and make decisions. - Deployed performance Control Centers for every CX client program (Gift Health, Earnest RCM, Almedia, Aurora, and more), Daily, WBR, and MBR views with drill-downs into any agent or team lead, plus editable grading targets. - SLA team analytics in one view, violations, compliance, audit outcomes, breach durations, top offenders, weekly and shift trends, fully filterable. - Manual entry for Management KPIs, CX Headcount, Billable Hours, and Billable HC with audit history and owner gates. - A machine-learning forecasting engine for agent-level P&L, with human-override anchors for edge cases. - Automated invoicing tied to billable hours, org chart and workforce planning, scheduling, a Data Trust layer for KPI definitions and the decisions log, embedded Omni dashboards with SSO, and QA scorecards.	
Business Intelligence Analyst Sterling Bank Plc. Hybrid	March 2023 – Feb 2026
- Initiated and led the 'OneService' project, which is Sterling Bank's internal ITSM tool, saving over \$150,000 in yearly costs. Built entirely in-house, this project cuts across all functions in technology like Incidents, Service Requests, Changes, Releases, Problem Management and Post Implementation Reviews - Built the backend infrastructure and frontend look of OneMonitor (v1 & v2), a real-time performance tracking platform for digital banking services (OneBank, Specta, USSD), resulting in a 60% faster resolution time for system errors, and saving the bank over \$100,000 yearly in infrastructure costs. - Deployed a supervised ML Ticket Classification Model for FreshService data, automating ticket routing and reducing resolution times by 55%. Also built the downtime ML model that predicts the root cause error and description of incidents drastically improving MTTR by 50% - Developed Python scripts to automate NIBSS Market Data ingestion and utilized Power Automate for hourly incident reporting, slashing manual report preparation from hours to minutes. - Optimized deployment processes by refactoring environment configurations and automating GitHub-to-server pulls, boosting delivery speed and reliability by 140%	

- Built the OneInsight platform for sentiment and location analysis, reducing data preparation time by 95% and giving 'instant insights' to the ITSM team.
- Implemented a full Disaster Recovery (DR) setup for critical databases to ensure 24/7 continuity of monitoring tools.

Data Scientist | Dash Studios | Remote

Nov 2019 – Feb 2023

- Expanded user base to over 10,000+ players across 65 countries, earning multiple awards, including Debut of the Year, through strategic data-driven initiatives to improve the effectiveness of ad campaigns. - Leveraged Google Analytics & SQL Tableau to analyze user behavior, informing game development and marketing strategies that enhanced engagement.
- Boosted player retention by 86% by optimizing user experience based on data insights and sustained competitive advantage through in-depth market analysis.

Data/People Analyst | Grand Cereals | Remote

Jan 2021 – Dec 2021

- Drove 40% sales increase in Cross River's South Region through adoption of a new platform, enabling distributors to place orders online.
- Optimized team structures and operational efficiency using data-driven workforce strategies, improving productivity across regional teams.
- Developed machine learning models with Python and scikit-learn to predict product sales for specific times and regions, reducing turnaround time from factory to distribution.

SKILLS

SQL, Python, R, TensorFlow, Scikit-Learn, Tableau, Power-Bi, Excel, Looker, JavaScript, React, Figma, Power Automate, GitHub

PRESS & MEDIA

- Featured in the 11th Annual Forbes Africa 30 Under 30 special issue (June/July 2025). [Read Article.](#)
- Voted Entrepreneur of the competition, Art of Lagos 2023.
- Nominated for the Black Tech Achievement Award, United Kingdom, 2023. [Read Article.](#)
- This Day Live Interview, 2023. [Read Article.](#)
